

# Stitch a Leaf

.....use fallen leaves to model a shelter for an elf, a sailing craft for a minibeast or a crown for a prince

Using just the fallen leaves and twigs around you, see if you can build something from your imagination. Leaves can be connected to each other by carefully threading thin twigs or leaf stems through the two leaves you want to attach.

- ☀️ Hold the leaves together and make 2 holes through both leaves.
- ☀️ Thread the twig or leaf stem up through one hole and down through the next, travelling through both leaves.
- ☀️ Connect as many leaves as you like to build your creation.

You can use twigs to build the frame for a shelter for an elf and then add some 'leaf shingles'.

Try building a boat to carry a bug across a puddle

Can you fashion a skirt fit for a fairy princess?

See if you can thread enough leaves together to make a crown to go around your head
